Let your imagination run wild! Storybook Ending is an all caps display font that looks like something straight out of a child's fairy tale. Uppercase letters appear thorny in appearance while the lowercase is more curvy and wispy. This font was inspired after Victorian lettering found in children's books along with vintage advertisements in publications. Use it for a children's book, logo, or toy packaging.

Basic Latin, extended Latin, Cyrillic, diacritics, punctuation, and kerning are included. Please check glyph maps for all supported characters. Basic Latin, numbers, and limited punctuation are available in the demo.

The full version is available for \$35 (personal use only). For EULA or commercial licensing please visit this page: [www.sharkshock.net/license](http://www.sharkshock.net/license) Commercial usage without a valid license is strictly prohibited and subject to legal action.

Thank you for your support!
