This font is an evaluation sample, a test drive typeface, provided to evaluate the quality of our font collection. Text or display fonts do not contain punctuation, as well as extended character set (accented characters and symbols). They can still be used for a valid evaluation of text color and contrast on a draft layout (usually set in latin words by professional artists, see "Lorem ipsum" in this package). Dingbat fonts (pictures fonts) contain only a few characters (i.e. ABCDE, abcde), which should suffice to see how such a font can be used, and judge the quality of each picture. Depending on the system you are using, missing characters may appears as little rectangles, or simply as spaces.

As a test drive, you can experiment with this font any way you like, and for how long you see fit, but please, do not modify the font files themselves. If you plan to use the tryout version for any corporate or professional use, we request that you get the full version.

You can purchase and download the complete font in minutes on our web site. Click on the [pad_file.htm](#) !

Since 1987, Match Software has been creating great font products.

Our collection offers original designs, not found in other collections or in regular commercial collections. Great foreign font too, if you need Russian, Hebrew, Ancient Greek, Slovak, Armenian, Japanese, etc. These fonts would cost hundreds of dollars in a regular store !

Many of these typefaces are definitely not available elsewhere. In a boring DTP world which used to be ruled by Times and Helvetica, make an aesthetic statement. Get your point across with taste and originality.

These types are compatible with typesetting as well, and are successfully used daily by the most prominent printers. Just hand them to your competent typesetter along with your desktop publishing documents, and you will get great films and printouts for your ads and all your graphic works. All registered fonts are provided in both TrueType and ATM PostScript Type 1 format, to suit all technical requirements.

For more information about the specific font in this package, open the [pad_file.htm](#) document that accompanies it too. Thank you for testing this Match Software font, from Fontmenu.com !

The author is a member of the Association of Shareware Professionals. All distributor members of ASP are welcome to distribute the archive package, and we are grateful for their help in making this software available to the public. If you are not a member of ASP and want to distribute this font as part of a shareware collection or package, please [contact us](#) first, and read the guidelines in the [pad_file.htm](#) document included into this archive.

Thank you for evaluating this typeface.
